

## WHEELCHAIR RAMPS

## SWEDISH QUALITY

We are proud of our heritage. Coming from the region of Småland, we are thrifty in the use of resources and know how to create an environment for seeds to grow and flourish.

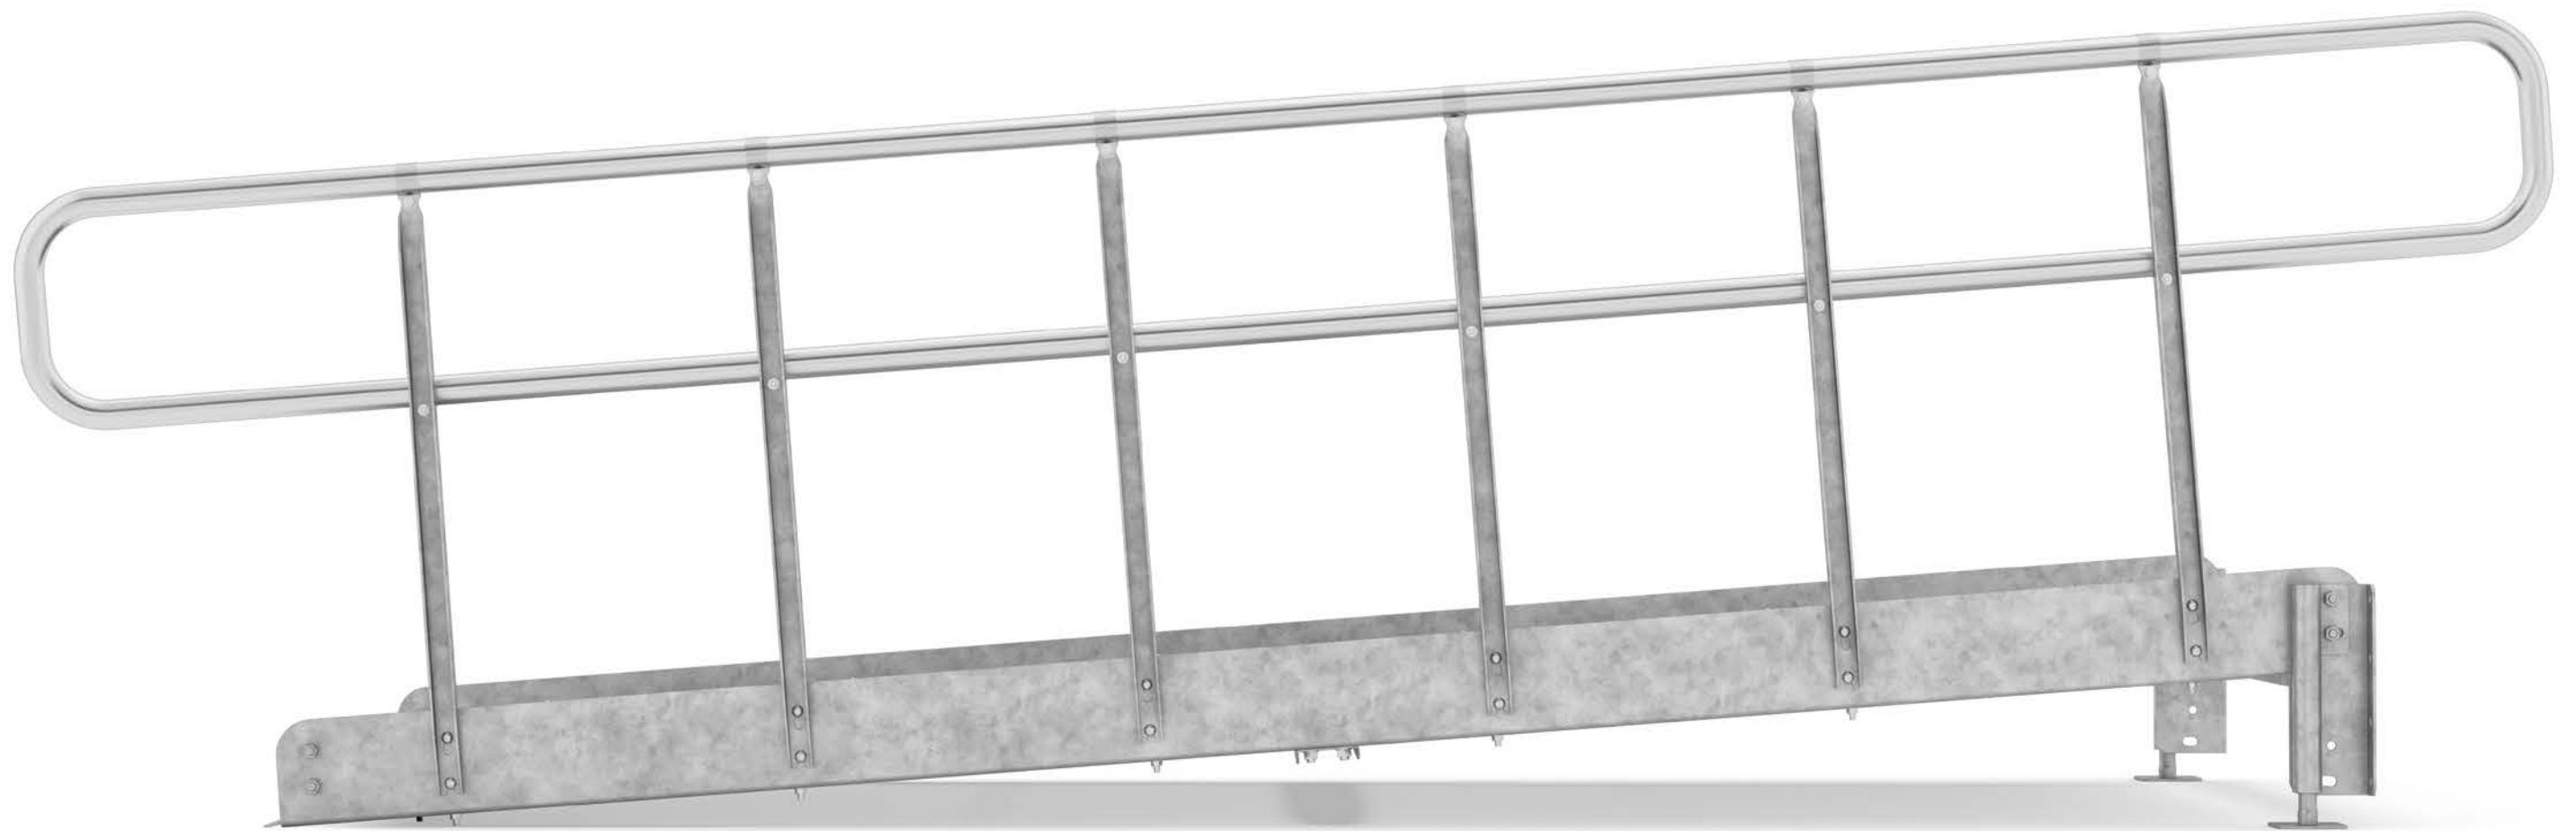

We place the utmost importance on delivering first-class Swedish products. All our investments are therefore made cautiously and with great care. We believe in the saying Hard work pays off, and by laying a stable and secure foundation we create opportunities far beyond our region.

# INNOVATION AND PRODUCTION

We are a leading manufacturer and supplier of spiral staircases, straight flight staircases, railings, wheelchair ramps, gangways, gratings, and mezzanines. Weland is also one of Sweden's major players in the sheet metal working sector.

We combine the wide range of products we keep in stock with extensive product knowledge, a high level of service, and fast deliveries. We continuously develop our machinery to ensure sustainable and reliable production of new, innovative products. This makes us a partner our customers can trust.

Our production and head office have been located in the town of Smålandsstenar, Sweden since the founding of the company in 1947.

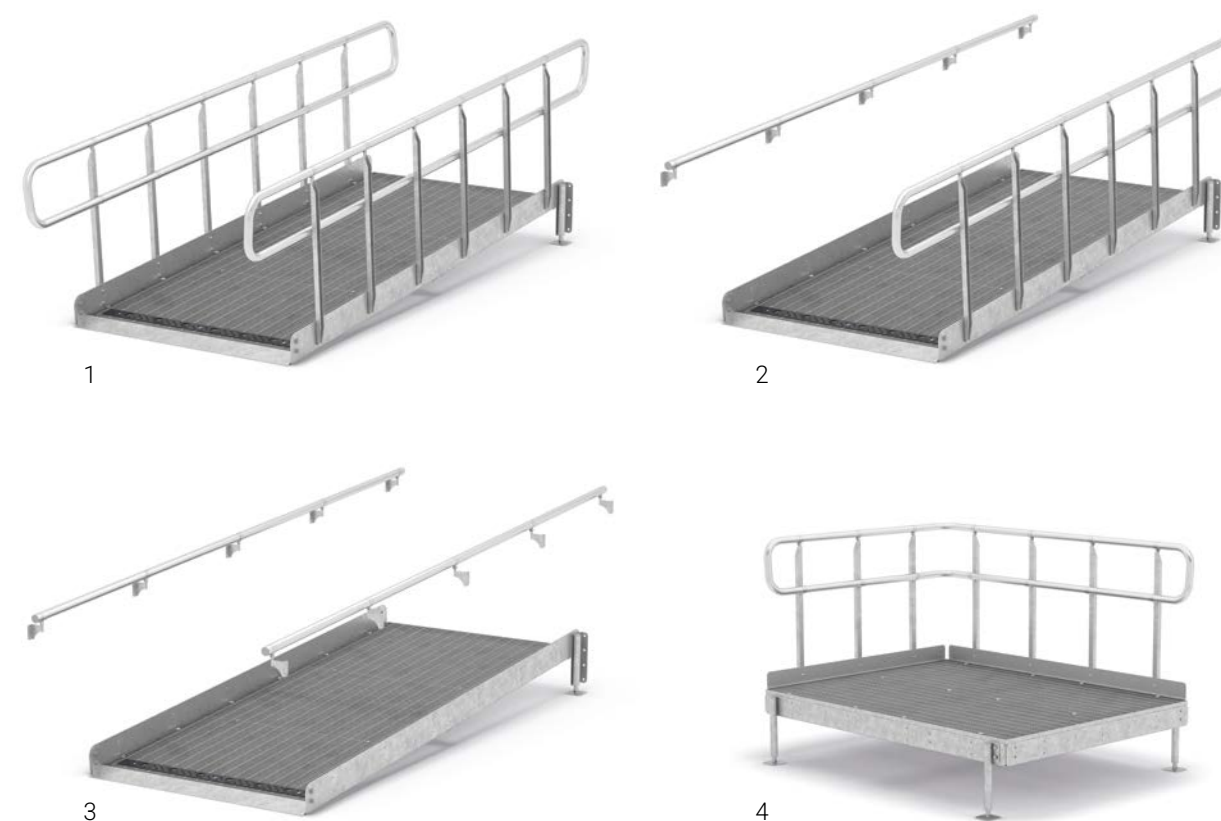

# SAFE WHEELCHAIR RAMPS

We manufacture top-quality wheelchair ramps that are stable, safe and easy to assemble. Complete access ramp solutions with floor grating are designed to suit your needs and wishes. Our standard components are held in stock, which means we offer despatch times that very few can match. Weland as your supplier of wheelchair ramps, you can be sure of a reliable and committed partner with a wealth of experience and skills.

Further technical details are available on our website, [www.weland.com](http://www.weland.com), and our experienced sales team can assist you with any query you may have.

#### EXAMPLE

1. Railing on two sides. 2. Railing on one side, banister on one side 3. Banister on two sides.  
4. Landing with railing on two sides (shown as railing with kick strip)

## RAMPS AND LANDINGS

Our wheelchair ramps made from grating are designed to create safe and secure passages between different levels. The connecting joint consists of sloping ramps with an adjustable inclination and is equipped with a kick strip and contrast marking.

In order to make it simple for customers, we stock ramps in a wide range of different lengths. The ramps can be equipped with a landing made of grating, which can either be used as a rest area, a turning level between two ramps, or as a descent level. In accordance with current regulations, intermediate landings have to be used when ramps are higher than 0.5 metres. Our landing are available in a couple of different sizes, creating opportunities for a wide

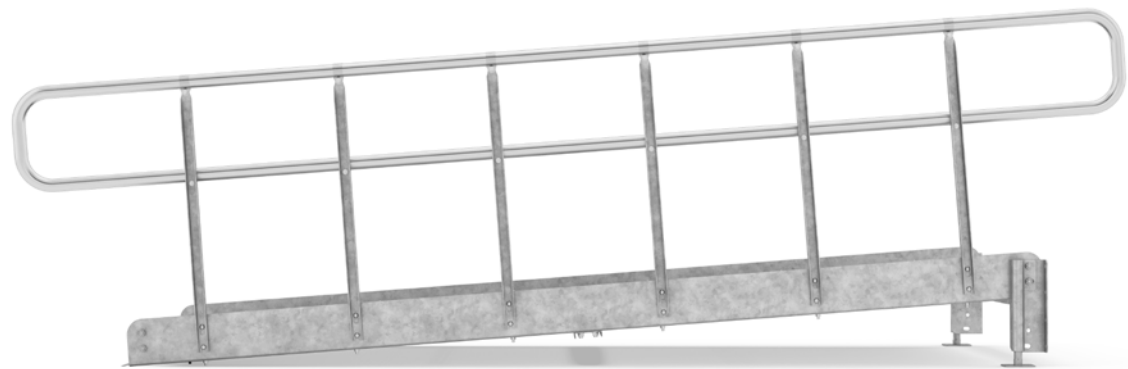

variety of different combinations of ramp and landing. In order to give you even more options, we also offer a number of different railings.

The ramps are designed and manufactured specifically according to your needs and requirements and, by having standard components always in stock, we can offer short delivery times.

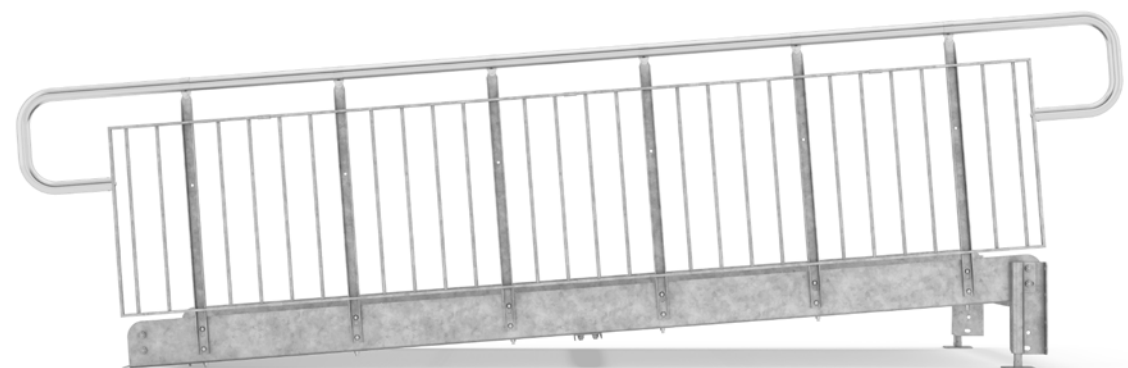

## RAILINGS

Combine our railings and handrails the way you want them! We offer two different types of railing that we always keep in stock - standard or round bar (childproof). The handrail in the railing is made of industrial stainless steel in a brushed untreated design. If the ramp is to be placed along a wall, a handrail on the wall may be a suitable alternative.

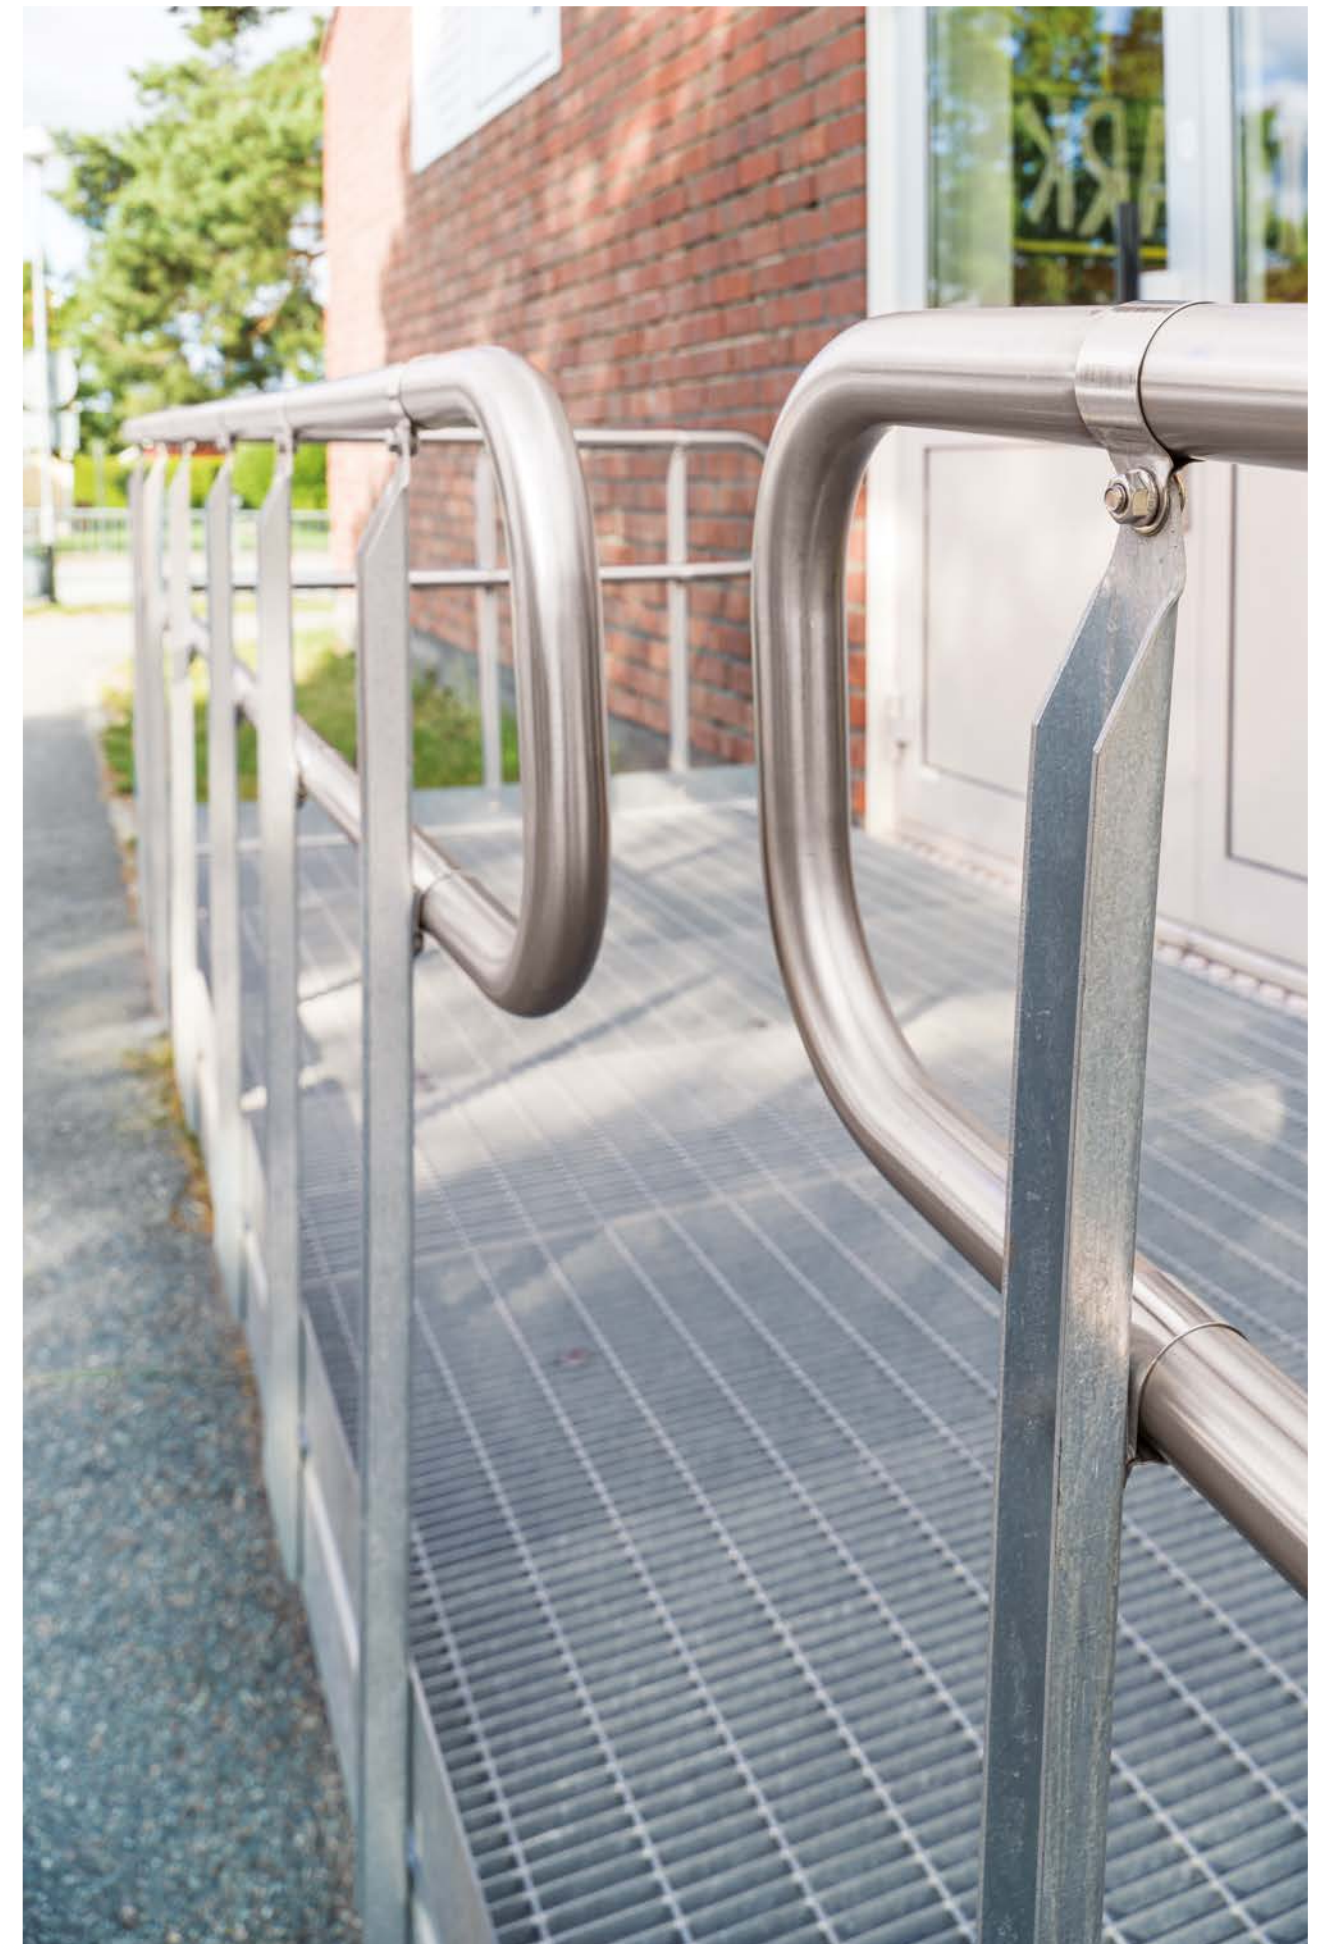

### RAILING, STANDARD

A stocked standard railing with baluster. Not childproof.

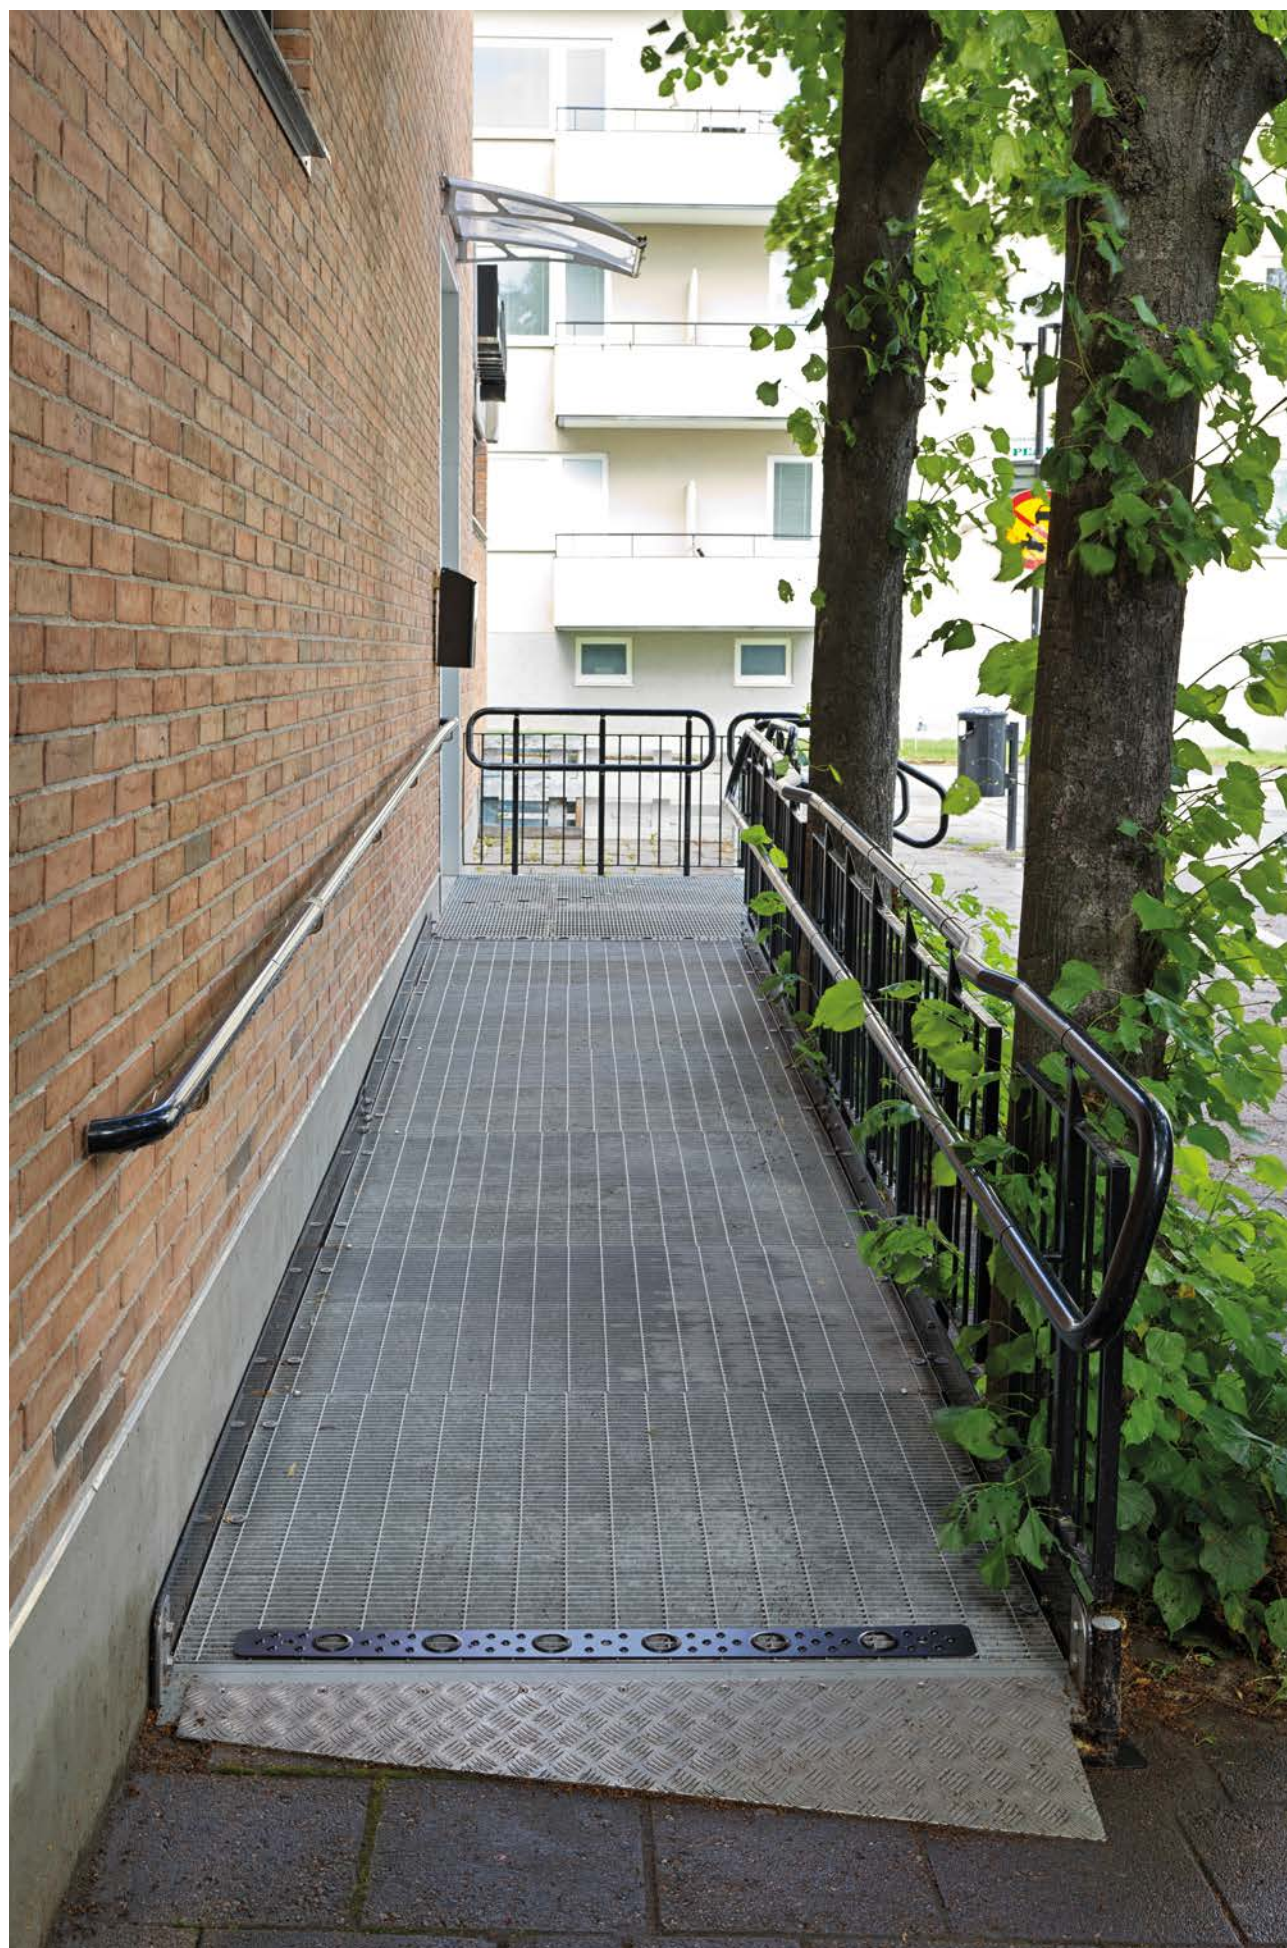

### RAILING, ROUND BAR

A childproof railing that is always in stock.

## ACCESSORIES RAILINGS

The choice of rail is dictated by the environment in which the ramp is to be located and whether it is to be used by children. To further increase safety in the ramp, we can equip it with several accessories.

### BANISTER

If the wheelchair ramp is to be placed directly along a wall, attaching a handrail on the wall may be a suitable alternative.

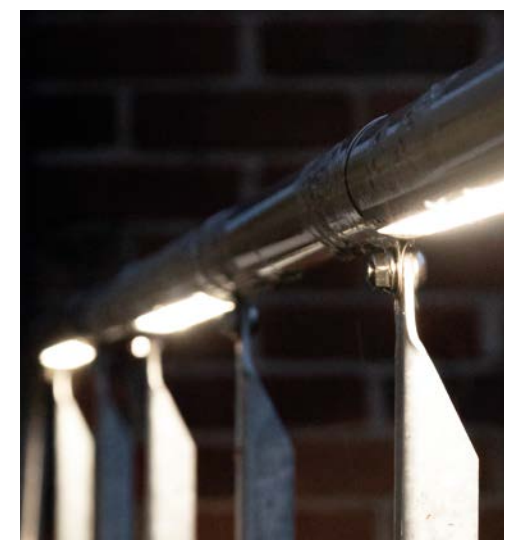

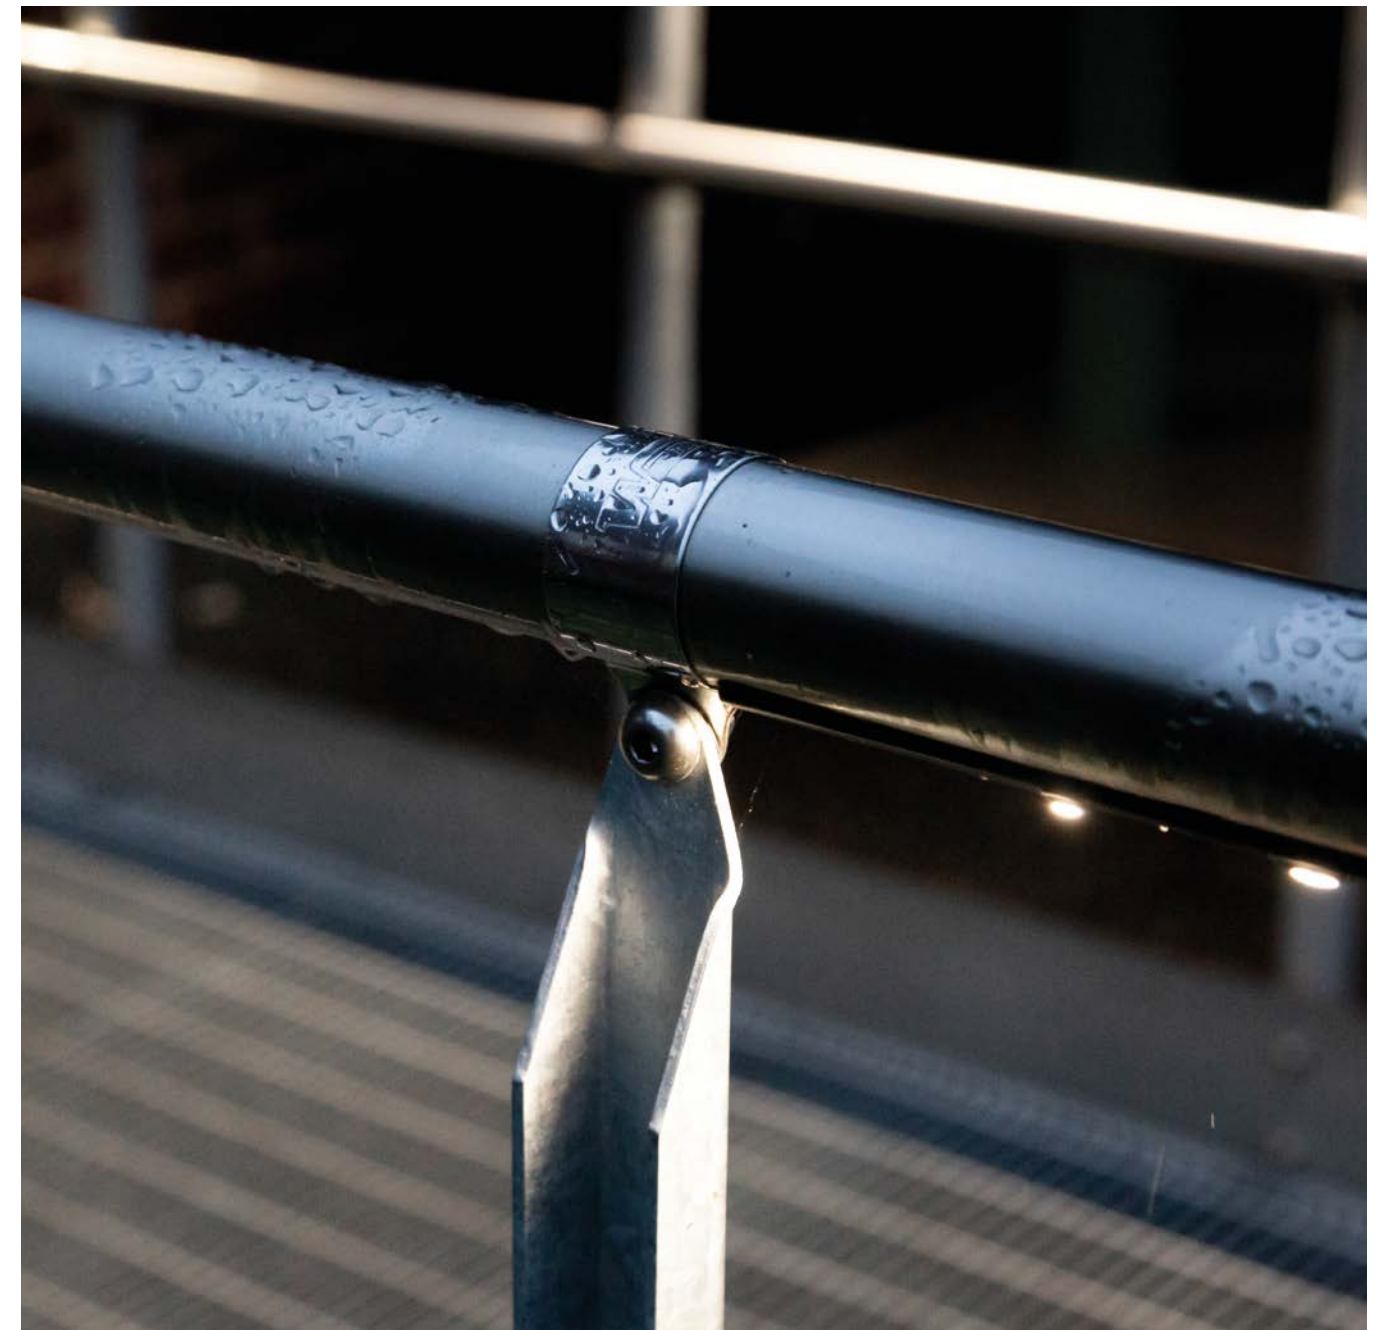

### EXTRA HANDRAIL

Round bar railings can be equipped with an extra guide that is placed under the regular one. A good way to further increase safety on the ramp. Extra handrail is included in Standard railing.

# LIGHTING

The addition of lighting creates a stylish and welcoming atmosphere. Lighting from the handrail can also serve a practical purpose, offering an extra element of safety by illuminating poorly-lit areas.

# PROJECT PLANNING

Our wheelchair ramps meet the relevant swedish requirements in the building regulations for public spaces. Public spaces must, by law, have an entrance that can be accessed without steps. Our wheelchair ramps are manufactured in Sweden, have a simple, robust design and are made of hot-dip galvanized steel for added stability and durability. The following information can be useful to bear in mind when requesting a quote and placing an order.

## FACTORS TO CONSIDER WHEN PLANNING YOUR PROJECT

- What is the purpose of the ramp?
- Is it to improve access for wheelchair users and people with mobility difficulties, or to facilitate the transport of goods?
- What width and lengths am I interested in?
- Does the length of the disabled access ramp meet the requirement for a maximum gradient of 1:12?
- The height difference between the ground and the landing at the top should not be more than 1 metre.
- Does the project need a childproof railing?
- Can I adapt my wishes to stocked sizes?
- Recessed LED lighting for the handrail is also available.

## FACTORS TO CONSIDER BEFORE ORDERING

- Make sure that the length of the ramp meets the minimum requirements for degree of incline.
- The standard width of 1300 mm is kept in stock and 1500 mm can be delivered within a short period of time.
- Check any requirements for child safety.
- We have a large range of ramps suitable for material transport etc. These are 900 mm in width.

We apply our many years of experience to guide and advise you at the planning stage. A drawing is made specially for each access ramp that is ordered and sent to the customer for approval prior to production.

Please contact us for further information.

## OUR EMPLOYEES MAKE THE DIFFERENCE

It is not the products or machines that make Weland. It is the people. Our committed, inventive, and attentive employees who know the meaning of high quality. We carry with us the family feeling of the small company we were at our founding, and we know what closeness to the customer is all about. We call it the Weland Spirit.
